Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status of Claims

1. Claims 1-21 have been examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Stefik et al., U.S. Patent No. 6,233,684.

As per claims 1, 3-13, 15-17, 19 and 20, Stefik et al. teach a coding device comprising:

- input (e.g. keyboards, mice, trackball, pad, touch screen, phone, fax, modem, digital storage device, or computer) for inputting text and/or image information to a printer (figures 3 and 14; column 14, lines 23-51)

- a network (e.g. internet) interface for receiving code information (e.g. watermark, license or copyright information) from a server pertaining to authorship and/or ownership of the text and/or image information using a printer (figures 6, 7, 14 and 15; column/line 8/42-9/11; column/line 9/65-10/62; column 14, lines 23-51; column 15, lines 2-6)
- a printer for printing text and/or image information onto a medium based on the code information (figures 6 and 15; column 9, lines 12-64)
- a browser and a digital filter for filtering text and/or image information based on code information (figures 6 and 7; column 9, lines 13-40; column/line 9/65-10/18)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 14, 18 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Stefik et al., U.S. Patent No. 6,233,684 in view of Pickens III, U.S. Patent No. 6,758,391.

As per claims 2, 14, 18 and 21, Stefik et al. teach a coding device for accessing and securely printing content (figures 14 and 15; column 14, lines 23-51). However, Stefik et al. do not specifically recite input comprising a scanner. Pickens III teaches input using a scanner (abstract). Specifically, users of the Pickens III system can scan document text and/or image information and use said information to query a database (figure 3B). Therefore, it would have been obvious to combine the teachings of Stefik et al. and Pickens III as a means for an author or publisher ('684, figure 1; column 9, lines 42-64; column 11, lines 5-24) to advertise content. For example, a user can scan the watermark (text and/or image information) on a friend's hardcopy version to have order another ('391; column/line 5/65-6/25) on which will be printed the watermark ('684, figures 6 and 7).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
- Auerbach et al. teach a secured system distributing content using watermarks
 - Olbricht teaches a browser to interface scanner

7. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Calvin Loyd Hewitt II whose telephone number is (703) 308-8057. The Examiner can normally be reached on Monday-Friday from 8:30 AM-5:00 PM.
